

Helixtap Technologies

Price and Market Intelligence in Natural Rubber

Helixtap Technologies has pioneered groundbreaking, AI-driven price and market intelligence for the rubber industry. Our product suite is designed to empower all participants across the natural rubber value chain to make smarter, more effective business decisions. From hedging to price forecasting, Helixtap has the proprietary data you need.

IN-HOUSE RESEARCH

Physical Prices - Democratising Data

Helixtap Technologies' proprietary physical price index is fundamental for accurate pricing that is fair and transparent. Pave the way to a sustainable future with us by meeting your company's ESG goals and targets.

Market Coverage - In-House Research & Analysis

Rubber industry news from across the world is at your fingertips. In-depth coverage of global events and trends are written daily by our in-house analysts to ensure you are always up to date.

Margin Reports

Analysis on raw material vs selling prices to determine current margins. Plan the profitability of your trades and purchases.

DATA AGGREGATION

Sentiment Analysis

Aggregating data from both proprietary and third party sources to generate a sentiment conclusion (bearish/bullish).

New Media

Compiling and scraping different sources to calibrate a comprehensive overview of the commodities markets to feed into AI-driven tools.

Commodity Correlation (Futures)

Make faster and more effective trade decisions through a comprehensive overview of scraped public futures prices that illustrate the correlations between rubber and other commodities.

AI-DRIVEN INSIGHTS

Price Forecasting

AI-driven predictive pricing and analyses to keep you ahead of trends so you can invest quickly and intelligently. Maximise profits and minimise costs with our machine learning predictions.

Option Pricing

In-house quants formulate algorithms to generate option pricing levels based on publicly available data points and spot data where applicable.
